**AMENDMENTS TO THE CLAIMS:**

1.(currently amended): An information distribution device which is connected with a plurality of terminal devices which belong to a group, and ~~from which identical information is distributed to said terminal devices,~~a content server storing distribution information via a network, said information distribution device comprising:

a first storage portion for storing terminal information including an address of each terminal device belonging to said group;

a first receiving portion for receiving, from ~~a one~~ terminal device belonging to said group, a distribution request including access information and distribution destination information, said access information being required for accessing the distribution information ~~stored in the content server for distribution to one or more of said terminal devices belonging to said group,~~ said distribution destination information specifying ~~a distribution destination other terminal devices than the one terminal device which belong to said group and to which the distribution information is to be distributed~~device belonging to said group;

a second receiving portion for accessing said distribution information stored in ~~a the content server which exists outside of said information distribution device,~~ based on said access information included in ~~a the~~ distribution request received by said first receiving portion from the one terminal device, and for receiving the distribution information accessed;

a second storage portion for storing said distribution information accessed and received by said second receiving portion; and

a first transmitting portion for ~~judging whether a terminal device specified by said distribution destination information included in a distribution request received by said first~~

~~receiving portion, is an address of a terminal device included in said terminal information stored in said first storage portion, and for distributing transmitting~~ said distribution information stored in said second storage portion to said one terminal device ~~which is judged included and the specified other terminal devices.~~

2.(original): The information distribution device according to claim 1, further comprising a third receiving portion for receiving a bill of charges from a device, said device billing for said distribution information charges when said distribution information is chargeable.

3.(original): The information distribution device according to claim 2, further comprising a second transmitting portion for transmitting said bill of charges received by said third receiving portion either to a terminal device which transmitted said distribution request or to a telecommunications carrier to which this terminal device subscribes.

4.(original): The information distribution device according to claim 1, further comprising a deleting portion for deleting said distribution information stored in said second storage portion after the distribution of said distribution information by said first transmitting portion.

5.(original): The information distribution device according to claim 1, further comprising a third transmitting portion for transmitting notification, to the terminal device which transmitted said distribution request, of the fact that distribution has been completed, after the distribution of said distribution information by said first transmitting portion.

6.(original): The information distribution device according to claim 1, wherein said distribution request further includes additional information added to said distribution information, and said first transmitting portion distributes said additional information in addition to said distribution information.

7.(original): The information distribution device according to claim 1, wherein said distribution request further includes a distribution time for specifying a time for distributing said distribution information, and said first transmitting portion distributes said distribution information at said distribution time.

8.(original): The information distribution device according to claim 1, wherein said terminal device information stored in said first storage portion includes information for representing an information format displayable on a display portion of the terminal device, and

wherein said information distribution device further comprises a conversion/filtering portion for converting or filtering said distribution information to a format capable of being displayed on a display portion of said terminal device, based on said information for representing said displayable information format.

9.(original): The information distribution device according to claim 1, wherein said first receiving portion receives said distribution request from said terminal device via another server device.

10.(original): The information distribution device according to claim 1, wherein said distribution information is either a program including a game program, said program and a license for said program, map information, or product information.

11.(currently amended): A terminal device belonging to a group constituted by a plurality of terminal devices, which are connected via a network to an information distribution device connected to a content server storing distribution information, the terminal device comprising:

a registration portion for registering, via a ~~telecommunications~~ said network, terminal information including an address of each terminal device belonging to said group[.]] in an said information distribution device ~~connected to the telecommunications network, and~~

a transmitting portion for transmitting, to said information distribution device, a distribution request including access information and distribution destination information, said access information being required for accessing the distribution information for distribution to one or more of said terminal devices belonging to said group, stored in the content server, said distribution destination information specifying a distribution destination terminal device other terminal devices, which belong belonging to said group and to which the distribution information is to be distributed; and

a receiving portion for receiving from the information distribution device, the distribution information which is stored in the content server and which is accessed based on the access information and transmitted to the other terminal devices according to the distribution destination information from the information distribution device.

12.(original): The terminal device according to claim 11, wherein said distribution request further includes additional information added to said distribution information.

13.(original): The terminal device according to claim 11, wherein said distribution request further includes a distribution time for specifying a time for distributing said distribution information.

14.(original): The terminal device according to claim 11, wherein said distribution information is either a program including a game program, said program and a license for said program, map information, or product information.

15.(currently amended): An information distribution system having a plurality of terminal devices belonging to a group ~~and connected via a network to an information distribution device from which identical information is distributed to said terminal devices, and a content server storing distribution information via the network wherein said plurality of terminal device comprises~~ devices comprise:

a registration portion for registering via said network, in said information distribution device, terminal information including an address of each terminal device belonging to said group in said information distribution device; and

a transmitting portion for transmitting, to said information distribution device, a distribution request including access information and distribution destination information, said access information being required for accessing the distribution information for distribution to

~~one or more of said terminal devices belonging to said group, stored in the content server said~~  
distribution destination information specifying ~~a distribution destination terminal device~~other  
terminal devices which belong ~~belonging to said group and to which the distribution information~~  
is to be distributed; and

a receiving portion for receiving from the information distribution device, the distribution  
information which is stored in the content server and which is accessed based on the access  
information and transmitted to the other terminal devices according to the distribution destination  
information from the information distribution device,

and wherein said information distribution device comprises:

a first storage portion for storing terminal information registered by said  
registration portion of said terminal device,

a first receiving portion for receiving said distribution request transmitted by said  
transmitting portion;

a second receiving portion for accessing said distribution information stored in the  
~~a content server which exists outside of said information distribution device,~~ based on said  
access information included in said a distribution request received by said first receiving portion,  
and for receiving said distribution information; and

~~a distributing transmitting portion for judging whether a terminal device specified~~  
~~by said distribution destination information included in a distribution request received by said~~  
~~first receiving portion, is an address of a terminal device included in said terminal information~~  
~~stored in said first storage portion, and for distributing, transmitting~~ said distribution information  
stored in said second storage portion to said terminal device ~~which is judged included.~~

16 (currently amended):

An information distribution method performed by a server
